Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Representative for applicant phoned examiner for clarification of office action dated 7/13/2007. Examiner discussed the Bowman reference in light of the previous claim amendments directed to a resecting member being generally proximate to said positioning member. Examiner stated that being proximal as claimed depends on how the apparatus is viewed, from different orientations. Representative also discussed the limitations as written in claim 12, directed to a rod and resecting tool separate, but again was discussed as both items could be considered as separate since they are at opposing ends--one may be proximal to the other.
